

Healthcare Supply Chain Services

Our Supply Chain Academy Online Programs

Best Practices Shared = Best Outcomes For Your Team

RDA has taken hundreds of years of experience coupled with best practices across hundreds of healthcare organizations to create online and facilitated healthcare supply chain courses. The online courses are available on demand and facilitated courses can be scheduled for groups or individuals. RDA also creates customized training for organizations.

Who is RDA's Academy for?

- New staff or staff new to healthcare supply chain
- Existing staff looking to enhance supply chain knowledge

Why Utilize RDA's Academy?

- Limited leadership time to train
- New staff, limited experience
- Existing staff, new role
- Existing staff, additional training needed

Benefits of RDA's Academy Programs

- Online, virtual, or in person training
- Flexible training schedule
- Receive certificate for each course completed
- Best practices developed from experience with hundreds of health systems nationwide (not a single facility)
- Facilitated training led by experienced supply chain leaders

Upon completion of each course, students will receive a certificate of completion. Completion certificates can be used towards Certified Materials & Resource Professionals (CMRP) certification.

ONLINE COURSES

RDA has created online courses for individuals or companies to purchase. Upon successful completion of each course, students receive a certificate of completion. These courses are available for immediate use.

Course:
Description:

Bare Facts of Healthcare Supply Chain

E-learning course that covers the basic concepts of the healthcare supply chain. The course covers the different types of entities involved as well as basic elements in the healthcare supply chain.

COURSE LENGTH
~ 1 Hour

Course:
Description:

Bare Facts of the OR Supply Chain

E-learning course that covers a high-level overview of topics pertaining to working in the OR supply chain. This course covers the OR environment, procedure, and precautions that should be understood before entering or working in the OR Supply Chain.

COURSE LENGTH
~ .5 Hour

Course:
Description:

Requisition to Clinician

E-learning course that provides a high-level overview of how acute facilities make spend decisions, and the typical steps from the point of a health system making a buying decision to the time a supply or service is available for use.

COURSE LENGTH
~ 1.25 Hours

Course:
Description:

Healthcare Financials for Supply Chain

E-learning course that covers a high-level overview of healthcare financials as related to the healthcare supply chain. This course provides insights into the three major financial statements, who pays the bills, patient charges, and supply chain actions that impact financials.

COURSE LENGTH
~ 1 Hour

Course:
Description:

Non-Clinical Healthcare Protocols

E-learning course that covers the universal protocols used in healthcare facilities.

COURSE LENGTH
~ .25 Hour

Course:
Description:

Inventory Management 101

E-learning course that covers a high-level overview of inventory management as related to the healthcare supply chain including the different inventory types, inventory methods, inventory technologies and tools, and best practices.

COURSE LENGTH
~ 2 Hours

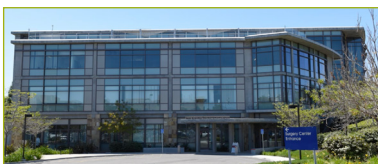

Course:
Description:

Bare Facts of Healthcare Supply Chain (Non-acute)

E-learning course that covers the basic concepts of the non-acute healthcare supply chain. This course covers the different types of entities involved as well as the basic elements of the non-acute supply chain. This course is for individuals who want to learn more about the non-acute supply chain.

COURSE LENGTH
~ 1 Hour

Course:
Description:

Requisition to Clinician (Non-acute)

E-learning course that provides a high-level overview of how non-acute facilities make spend decisions, and the typical steps from the point of the facility making a buying decision to the time a supply or service is available for use.

COURSE LENGTH
~ .5 Hour

Course:
Description:

Project Management Principles for Non-Project Managers

E-learning course designed to provide non-project managers project management principles to aid in any size project. This course covers the five steps of a project life cycle, how to create a project charter and project plan, and methods to proactively monitor and manage potential project risks.

COURSE LENGTH
~ 1 Hour
